

CUTIMED® SORBION® SORBACT® SUPER-ABSORBENT DRESSING

FOR REMOVING EXUDATE AND PHYSICALLY BINDING BACTERIA

Superabsorbent core of fibers and gel-forming polymers absorb and retain large volumes of exudate

The coated wound contact layer utilizes the hydrophobic bacteria binding Sorbact® Technology which facilitates efficient dressing changes

Anti-strikethrough absorbent backing layer helps prevent leakage, and provides time-saving dressing changes.

SUPER-ABSORBENT DRESSING THAT ALSO MANAGES BACTERIA

SAFE REMOVAL OF BACTERIA

- Cutimed® Sorbion® Sorbact® featuring Sorbact® Technology safely and irreversibly binds bacteria, helping to reduce toxin release and replication
- Unlike other antimicrobial wound dressings, bacteria physically bind to Sorbact® Technology, so cell debris may be safely removed from the wound bed
- An excellent alternative option from other antimicrobial dressings, as there is no release of active agents and no known cases of bacterial resistance.

ABSORBS AND RETAINS EXUDATE

- The superabsorbent core absorbs and retains moderate to high levels of exudate reducing the risk of skin maceration, even under compression

Ordering Information

	Size	Ref-No.	Dressings/ Box
Cutimed® Sorbion® Sorbact®			
	4 x 4 in.	7269808	10
	4 x 8 in.	7269809	10
	8 x 8 in.	7269810	10
	8 x 12 in.	7269811	10

Indications

Cutimed® Sorbion® Sorbact® is indicated for use in the management of shallow, heavily exuding, partial to full thickness wounds (including clean, colonized, contaminated, or infected wounds); chronic wounds (venous and arterial ulcers, diabetic ulcers and pressure ulcers), postoperative dehisced wounds and traumatic wounds.

Sorbact® is a registered trademark of ABIGO Medical AB.
Please refer to the product label and/or package insert for full instructions on the safe use of these products.
